

PS370

 OMR and imaging scanner

The DRS PS370 scanner brings OMR and Imaging together

With the PS370, organisations can conduct production-level data collection with high-resolution imaging in a single device. The PS370 sets a new standard in data collection innovation by offering premier data accuracy and throughput.

The PS370 simplifies data entry while ensuring a level of accuracy and efficiency unattainable through manual key entry. Productivity is enhanced by the scanner's automatic document feeder, which eliminates the need to hand feed each form.
